Plague.

Modification of rules 5 and 10 of the rules for the issue of the plague prophylactic from the Bombay Bacteriological Laboratory.

GOVERNMENT OF BOMBAY.

GENERAL DEPARTMENT.

Order no. 7380.

Bombay Castle, 6th November 1916.

Letter from the Director, Bombay Bacteriological Laboratory, no. 3732, dated the 26th August 1916 :—

" I have the honour to invite your attention to the following :—

" 2. Hitherto a charge of 1 anna and 3 pies has been made for each Maynard's bottle in which anti-plague vaccine has been supplied from this Laboratory, in accordance with the accompaniment to the Government Resolution, General Department (Plague), no. 1567-P., dated the 16th November 1907.

" 3. On account of the present disturbed conditions in Europe, and the great difficulty experienced in obtaining such work done in England, Dr. Maynard reports that he has been obliged to increase the rate of these bottles from 10 shillings to 30 shillings per gross.

" 4. Under the circumstances I have the honour to propose that the cost of Maynard's bottles should now be increased from 1 anna 3 pies to 2 annas and 9 pies per bottle to enable us to defray the enhanced cost of the article.

" 5. If you approve of this proposal, I have the honour to request the favour of your obtaining the necessary sanction of Government in the matter."

Letter from the Director, Bombay Bacteriological Laboratory, no. 4119, dated the 12th September 1916 :—

" With reference to your memorandum no. D.—2000, dated the 2nd instant, I have the honour to report that the original charge of 1 anna and 3 pies per Maynard's bottle included not only the actual cost of the bottle *plus* packing, freight and insurance charges, viz., 10 pies, but also an additional charge of 5 pies per bottle to cover loss through breakages.

" The proposed increased charge of 2 annas and 9 pies as suggested in my letter no. 3732 of the 26th ultimo was made up of the increase in the cost of bottles and in the rates for freight and insurance, but it did not include any additional charge to cover the loss through breakages; this latter charge was intentionally omitted as it was thought advisable to keep down the price of the bottles as much as possible. Upon further consideration, however, it appears that it will be necessary to make some additional charge for covering the loss through breakages, and I am of opinion that a charge of 3 pies per bottle will be sufficient for the purpose.

" I have the honour to propose, therefore, that the enhanced rate for the Maynard's bottles be now fixed at 3 annas per bottle instead of 2 annas and 9 pies as suggested in my letter no. 3732 of 26th August 1916."

Memorandum from the Surgeon General with the Government of Bombay, no. D.—2134, dated the 20th September 1916—

Forwarding the above letters from the Director, Bombay Bacteriological Laboratory, with reference to Government Resolution, General Department, no. 1567-P., dated the 16th November 1907; and recommending that in the circumstances stated by the Director, the cost of each bottle may be increased from 1 anna and 3 pies to 3 annas, and that rule no. 5 of the rules for the issue of plague prophylactic may be amended accordingly.

ORDER.—The price of the bottles to be recovered should be increased from 1 anna 3 pies to 3 annas as proposed by the Surgeon General. Rules 5 and 10 of the rules sanctioned in Government Resolution no. 1567-P., dated the 16th November 1907, have been modified* accordingly.

G. A. THOMAS,
Acting Secretary to Government.
